

Superior Training from TYMCO

We want you to understand the Regenerative Air System and your TYMCO sweeper completely, so you can get optimal performance from your equipment investment. That's why, for more than twenty-five years, we've offered two-day scheduled training schools at our facility in Waco, Texas. Owners, managers, operators and mechanics get hands-on training and answers to specific questions. Enrollment levels are kept low, so you and your team will get personal attention as well as the opportunity to learn from the experiences of other attendees through the interaction of the class.

When your operators and mechanics are thoroughly trained and knowledgeable about the TYMCO sweeper, you get better performance and a lower cost per operating hour.

- TYMCO offers full two-day schools
- Choose from over 30 schools scheduled per year
- Yearly class schedules and class agendas are available
- Learn through demonstrations on an operational sweeper
- Special schools arranged for large groups
- Register to attend on our web site

Specifically designed for training, our 3500 square foot, temperature controlled facility provides ample space for demonstrations on an operational sweeper and systems components. We also provide daily ground transportation from the hotel to our training facility, and lunch is on us.

Convenient Dealer Service Centers

In over 50 U.S. locations and dozens of others worldwide, you receive on-the-spot parts and service from TYMCO's exclusive network of dealers.

This product is protected by numerous U.S. and Foreign Patents.

Model DST-4®
Dustless Sweeping Technology

MADE IN WACO, TEXAS **USA**

DST-4

Dustless Sweeping Technology

Environmentally Superior Cleaning™ for:

- Year Round Dustless Sweeping Where Normal Water/Dust Control Freezes
- PM₁₀ Non-Attainment Areas
- Municipal Sweeping and DOT Applications
- Industrial Plants

Environmental Technology Verified and Licensed

Locking side panels swing away for easy access to the auxiliary engine and blower housing.

Large hydraulically operated dump door allows for easy discharge and cleaning.

Large 4.0 cubic yard, heavy-duty steel hopper increases sweeping time and the 72 inch dump height enables dumping into various size hoppers.

TYMCO's patented, Self-Contained Multiple Filtration System enhances the Regenerative Air System, allowing the DST-4 to keep cleaning Wet or Dry.

Hopper deluge system is provided for easy cleaning.

Heavy-duty hydraulic dump cylinders for high dumping those heavy loads.

Spacious, full-sized air conditioned cab offers operator comfort and excellent visibility.

Dual translucent water storage tanks allow for a 76 gallon water capacity.

Heavy-duty Isuzu 17,950 lb. GVW chassis can be equipped with optional dual steering.

Operator friendly Sweeper Control Panel illuminates for easy night vision.

Time-tested, heavy-duty 82 inch O.D. floating pickup head provides a wide sweeping path, maintaining contact with the pavement with no operator adjustment.

Dual 36 inch diameter wire filled digger style gutter brooms can increase sweeping width to 114 inches, making short work of accumulated dirt and debris along curbs, walls and gutters.

Sweeper photographs may contain optional equipment - Consult your dealer for more information.
